CERTIFICATION REQUIREMENT FOR UNDERGROUND STORAGE TANK OWNERS/OPERATORS: Recent amendments to the [underground storage tank rules](#) (incorporated in R 29.2108) based on federal requirements, require that each underground storage tank facility (regulated under [Part 211](#)) have Class A, Class B, and Class C operators. For further details on obtaining the training and certification, see the "Flyer on Certification Requirements for UST Owners/Operators" and the "Certification Requirements Notification Letter to UST Owners/Operators." Both of these documents are available from the "What's New" section of the DEQ Remediation Division's [homepage](#). If you have any questions, please contact **Mr. Kevin Wieber**, Field Operations Section, MDEQ Remediation Division, Phone: 517-335-7260, e-mail: wieberk@michigan.gov.

REMEDIA- TION DIVISION

LEAKING UNDERGROUND STORAGE TANKS REGULATION REVISED. ALSO, QUALIFIED UNDERGROUND STORAGE TANK CONSULTANTS (QC) AND CERTIFIED UNDERGROUND STORAGE TANK PROFESSIONAL (CP) PROGRAM REPEALED. On May 1, 2012, legislative amendments to Part 213, Leaking Underground Storage Tanks, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA), were signed by Governor Snyder and became immediately effective. The amendments require the use of the Risk-Based Corrective Action (RBCA) processes developed by the American Society of Testing & Materials (ASTM) as the basis for addressing contaminated properties. The legislative changes also modify time frames for reports required to be submitted by owners or operators responsible for leaking underground storage tank releases. If the required reports, (which are to document corrective actions taken at a leaking underground storage tank (LUST) site based on the ASTM RBCA standard), are not audited by the DEQ within specified timeframes, they are considered approved by operation of law. Overall, the amendments intend to provide more cost effective and efficient closures of LUST releases while maintaining acceptable protectiveness of human health. The May 1st legislation also amended Part 215, Refined Petroleum Fund (RPF) of the NREPA. The Part 215 changes repealed the DEQ's obligation to evaluate and annually update a list of QCs and CPs approved to perform leaking UST cleanup work. The owner or operator is now responsible for assuring that the consultant, who must sign an affidavit attesting to their qualifications as well as the content of a Closure Report, meets the minimum QC qualifications established in Part 213. Additionally, the Part 215 revisions include extending the collection of the RPF fee for three years, to December 31, 2015. The fee is currently used, in part, to fund state costs incurred when addressing orphaned (no liable party) leaking UST sites. The new law also requires that the DEQ establish an Underground Storage Tanks Cleanup Advisory Board that is to report to the legislature, by March 1, 2013, recommendations on using RPF money to assist owners and operators in financing corrective actions required by Part 213. Viewing of the Part 213 and Part 215 amendments is possible by entering the Michigan Legislative Website at: www.legislature.mi.gov and searching on Senate Bills 528 through 533 (enter bill number in LEGISLATIVE BILL SEARCH - Bill Number (current session) and when taken to the specific bill Webpage select "Public Act" from the Documents list.). The links for the compiled Part 213 and Part 215 are available from the DEQ Remediation Division's homepage at www.michigan.gov/deqrrd. Information Contacts: Part 213 Amendments - **Dennis B. Eagle**, Remediation Division, 517-335-4918, or e-mail eagled@michigan.gov; Part 215 Amendments, **Brian K. Muench**, Remediation Division, 517-335-6243, or e-mail muenchb@michigan.gov.

COLLABORATIVE STAKEHOLDER INITIATIVE (CSI) – REINVENTION OF STATE'S CLEANUP AND REDEVELOPMENT PROGRAMS.

Recently the Michigan Department of Environmental Quality (DEQ) embarked on a Collaborative Stakeholder Initiative (CSI) to reinvent the state's cleanup and redevelopment programs. The DEQ selected the following seven areas on which to focus recommendations for improvement.

- Brownfield Redevelopment
- Groundwater Surface Water Interface
- Cleanup Criteria
- Part 201 Rules
- Due Care Obligations
- Vapor Intrusion
- Free Product/Source Removal/Csat

The DEQ partnered with stakeholders and Michigan State University (MSU), through its Cooperative Extension (MSUE) to design and implement this process. The CSI participants included DEQ staff and external practitioners with expertise and experience relevant to the issue. The recommendations of the CSI effort are now available online and the links are provided below:

AIR PERMIT APPLICATION WORKSHOP FOR FIRST-TIME APPLICANTS, CONSTITUTION HALL, LANSING, MICHIGAN. For most first-time applicants, completing the Permit to Install application is a daunting task. However, submitting a complete and timely application can be more manageable if you know what's expected. The Michigan Department of Environmental Quality is offering this workshop designed to give information on how to submit a complete permit application. Since this workshop is geared to first-time applicants, a significant portion of the session is devoted to your specific application. Air Quality Division permit engineers will be available to discuss your permit application with you one-on-one. To take full advantage of this time with the permit engineer, it is recommended you bring detailed information about your project with you to the session. This training is designed for first-time air permit applicants who need help completing their permit application; however, those who have applied before and need a refresher are welcome to attend as well. Registration fee is \$35 and includes workshop materials. Updated workshop information and registration is available on the Web at www.michigan.gov/deqworkshops, click on "DEQ Workshops". Information Contact: **James Ostrowski**, Office of Environmental Assistance, 517-241-8057, or e-mail at ostrowskij2@michigan.gov. Registration Information: **Environmental Assistance Center**, 800-662-9278, or e-mail at deq-assist@michigan.gov.

2012 MICHIGAN GREEN CHEMISTRY AND ENGINEERING CONFERENCE: DRIVING SUSTAINABLE MANUFACTURING, WAYNE STATE UNIVERSITY, DETROIT, MICHIGAN. The 2012 GreenUp Conference and 4th Annual Michigan Green Chemistry Governor's Awards Ceremony will take place in Detroit – a city fueled by innovation and ripe with opportunities for driving sustainable manufacturing through green chemistry and engineering. A revitalization of manufacturing is occurring nation-wide. Green chemistry and engineering is contributing to this revitalization by employing less toxic materials and processes in the manufacture and design of the products we use every day. For researchers, chemists, engineers, industry CEOs, students, educators, entrepreneurs, decision-makers, policymakers – anyone interested in Michigan's march toward smart, sustainable growth – this conference is the opportunity to hear from leading experts and share innovative ideas on how we can best "green up" Michigan and drive sustainable manufacturing through green chemistry and engineering! Updated conference information is available on the Web at www.michigan.gov/greenup. Registration Information: **Environmental Assistance Center**, 800-662-9278, or e-mail at deq-assist@michigan.gov. Information Contact: **Jennifer Acevedo**, Office of Environmental Assistance, 517-335-3203 or e-mail at acevedoj@michigan.gov.
